## Right-To-Know Training and Lab Safety Completion Form

I have successfully completed the Anoka Ramsey Community College Right-To-Know (RTK) training program to the satisfaction of myself and my instructor. I understand the significance of each training subject and how it applies to my work environment, including:

- Procedure for Blood Spills in the lab area
- Understanding how to use the available Personal Protective Equipment available in the lab area, such as Eye Protection (safety glasses), gloves, shoes, lab aprons, and fume hoods
- Safety protocols for proper chemical and material handling in the lab area
- Chemical MSDS safety sheets that explain the risks and hazards of the chemicals used in the lab area
- Knowledge of the location of key safety stations in the lab such as the eye wash, safety shower, fire extinguisher, and fire blanket
- Understanding the proper procedure for disposing of hazardous lab wastes
- Knowledge of the procedure for broken glass cleanup in the lab area
- Understanding no food or drink is allowed in the lab area at any time
